ACKNOWLEDGEMENTS

The big influencers help me to implement this thesis

Firstly, I owe my deepest gratitude to my supervisor, Dr. Nguyen Thi Hong Minh whose encouragement, guidance, and support from the initial to the final level has enabled me to overcome many difficulties and develop my research skills.

It is an honor for me to extend my special thanks to all the staff, especially,

the teaching staff at DPA school. Without their help and encouragement, I would not have accomplished my thesis.

My special thanks would also go to the teachers and students who have participated in this project. Without their assistance, I would not have been able to collect valuable data for the project.

I owe deeply my family, especially my parents, my husband, whose continuous encouragement, support, and love has helped me pass through insurmountable difficulties during my project.

ABSTRACT

This project aims to propose guidelines for teachers of English in DPA kindergartens in the implementation of experiential activities in English teaching for 6 year – old kids.

Qualitative, quantitative and experimental methods was used for this study. Data analysis is the process used to demonstrate the data and information collected from survey questionnaires and observation checklists.

The results show that organizing experience activities is really useful, not only helps children increase their interest in activities but also can provide them with a significant amount of knowledge about environmental issues and environmental education. Thereby, children are aware of learning more and easily absorb more knowledge. Students do not feel boring and rigid in the learning process. Let children really learn and play.

From the above statements, can be seen, the organization operating experience should be conducted and apply more to general and preschool children preschool 6 years old in particular. This helps children develop comprehensively and love school more.
