## **BIOGRAPHICAL SKETCH**

The author was born on March 29, 1980 in Thai Nguyen City, Thai Nguyen Province, Vietnam. He is the eldest of two children of Mr Nguyen Van Hoi and Mrs Nguyen Thi Nhan. He finished his elementary, secondary, and high school education from Thai Son, Quang Trung, and Luong Ngoc Quyen School, respectively in Thai Nguyen City, Thai Nguyen Province, Vietnam in 1998.

He completed his bachelor's degree in Forestry from the Thai Nguyen University of Agriculture and Forestry (TUAF), Thai Nguyen City, Thai Nguyen Province in 2002. Through the Australia Development Scholarship (ADS), he was able to earn his Master's degree in Forest Science and Management at the Southern Cross University, New South Wales, Australia in 2012.

In 2015, the Southeast Asian Regional Center for Graduate Study and Research in Agriculture (SEARCA) granted him a scholarship to pursue his PhD degree in Forestry: Forest Resources Management at the College of Forestry and Natural Resources, University of the Philippines Los Banos (UPLB).

He is currently employed as a teacher and researcher at the Faculty of Forestry, Thai Nguyen University of Agriculture and Forestry, Thai Nguyen Province, Vietnam.

He is happily married to Ms. Pham Thi Hoai, with whom he is blessed with a son, Nguyen Lam Khoa and a lovely daughter, Nguyen Tue An.

**HUNG TUAN NGUYEN**

## **ACKNOWLEDGMENT**

First and foremost, my sincerest thanks to my institution, Thai Nguyen University of Agriculture and Forestry for allowing me to go on study leave and to the Southeast Asian Regional Center for Graduate Study and Research in Agriculture (SEARCA) for awarding me a scholarship to pursue a PhD degree in UPLB.

Special thanks are extended to Dr. Teodoro R. Villanueva, Chair, advisory committee, for his intellectual and professional guidance, critical comments, encouragement and remarkable interest in supervising this study. My grateful acknowledgment also to the members of my advisory committee: Dr Myrna G. Carandang, Dr Wilfredo M. Carandang, and Dr Juan M. Pulhin for their valuable comments, sincere concern, and understanding.

I am also thankful to the rest of the faculty and administrative staff of the Institute of Renewable and Natural Resources and the Faculty of UPLB Graduate School for their great support.

A note of gratitude also goes to all the members of the Faculty of Forestry, Thai Nguyen University of Agriculture and Forestry for the support and assistance extended to me for my study. My deepest gratitude goes to my loving family for all their sacrifices and encouragements. I am forever grateful to my loving wife, Mrs. Pham Thi Hoai, my son, Mr. Nguyen Lam Khoa and my daughter Ms Nguyen Tue An for their love and spiritual support.

Special thanks also go to all of my sincere friends in Vietnam, as well as in UPLB who have directly or indirectly helped me during my stay at UPLB and also during the conduct of dissertation research in my country.
