**Library of Congress Cataloging-in-Publication Data**

Names: Shrestha, S. (Shailesh), editor.

Title: Farm-level modelling : techniques, applications and policy / edited by: S. Shrestha, A.P. Barnes, and B. Vosough Ahmadi.

Description: Boston, MA : CABI, [2016]

Identifiers: LCCN 2016002564 | ISBN 9781780644288 (hbk : alk. paper) | ISBN 9781786390387 (epub)

Subjects: LCSH: Agriculture--Economic aspects--Mathematical models.

Classification: LCC HD1433 .F37 2016 | DDC 338.101/1--dc23 LC record available at <http://lccn.loc.gov/2016002564>

ISBN-13: 978 1 78064 428 8

Commissioning editor: Ward Cooper

Editorial assistant: Emma McCann

Production editor: Tim Kapp

Typeset by SPi, Pondicherry, India

Printed and bound in the UK by CPI Group (UK) Ltd, Croydon, CR0 4YY

<b>Contributors</b>	vii
<b>Foreword</b>	xiii
<b>Preface</b>	xv
<b>Acknowledgements</b>	xvii
<b>PART 1: FARM-LEVEL ASSESSMENTS</b>	
<b>1 Policy Impact Assessment</b>	1
<i>Maria Blanco</i>	
<b>2 Positive Mathematical Programming</b>	14
<i>Filippo Arfini, Michele Donati, Roberto Solazzo and Mario Veneziani</i>	
<b>3 Modelling Farm-level Adaptations Under External Shocks</b>	31
<i>Shailesh Shrestha and Bouda Vosough Ahmadi</i>	
<b>4 Farm-level Modelling, Risk and Uncertainty</b>	44
<i>Stephen Ramsden and Paul Wilson</i>	
<b>5 Modelling Farm-level Biosecurity Management</b>	58
<i>Arnaud Rault and David A. Hennessy</i>	
<b>6 Modelling Farm Efficiency</b>	77
<i>Patrick Gillespie, Fiona Thorne, Thia Hennessy, Stephen Hynes and Cathal O'Donoghue</i>	
<b>7 Quantifying Agricultural Greenhouse Gas Emissions and Identifying Cost-effective Mitigation Measures</b>	95
<i>Michael MacLeod and Vera Eory</i>	
<b>PART 2: MODELLING BEYOND THE FARM GATE</b>	
<b>8 Moving Beyond the Farm: Representing Farms in Regional Modelling</b>	112
<i>Jinxiu Ding, Bruce A. McCarl and Weiwei Wang</i>	

<b>9 Farm-level Microsimulation Models</b>	134
<i>Cathal O'Donoghue</i>	
<b>10 Scaling Up and Out: Agent-based Modelling to Include Farmer Regimes</b>	147
<i>Andrew P. Barnes, Eleonore Guillem and Dave Murray-Rust</i>	
<b>11 Catchment-level Modelling</b>	156
<i>Joana Guimarães Ferreira, Patrick Abbot and Andrew P. Barnes</i>	
<b>12 Modelling Food Supply Chains</b>	173
<i>Cesar Revoredo-Giha</i>	
<b>13 Linkage of a Farm Group Model to a Partial Equilibrium Model</b>	189
<i>Alexander Gocht, Pavel Ciaian, Maria Espinosa and Sergio Gomez y Paloma</i>	
<b>14 Conclusions: The State-of-the-art of Farm Modelling and Promising Directions</b>	206
<i>Thomas Heckelei</i>	
<b>Index</b>	215

---

**Patrick Abbot** is Managing Director of LTS International Ltd and has a professional and research career in environment and climate change. His more recent research focus has been on applying and measuring open system theories to complex land-use and social change.

Address: LTS International Ltd., Pentlands Science Park, Bush Loan, Penicuik, Edinburgh, EH26 OPL, UK. E-mail: paddy-abbot@ltsi.co.uk

**Filippo Arfini** is Professor of Agricultural Economics as well as of Rural Policies in the Department of Economics, University of Parma. His fields of research are policy assessment by means of quantitative analysis, agri-food chain management for Geographical Indication (GI) products, quality economics and related policies, and rural development dynamics. His research activity has developed in the framework of national and European research programmes. He is the author of several publications on the issue of GIs and their implication on rural development.

Address: Department of Economics, University of Parma, Via J. F. Kennedy 6 - 43125, Parma, Italy. E-mail: filippo.arfini@unipr.it

**Andrew P. Barnes** is an agricultural economist and Reader in Innovation and Behavioural Change within the Land Economy, Environment and Society (LEES) Research Group of Scotland's Rural College (SRUC). His main research focus is on capturing the impacts of policy change and farmer behaviour at the farm and catchment level within a modelling framework. He currently leads the Policy, Innovation and Behaviours Team at SRUC.

Address: LEES, Scotland's Rural College, Edinburgh, EH9 3JG, UK. E-mail: andrew.barnes@sruc.ac.uk

**Maria Blanco** is an Associate Professor of Agricultural and Resource Economics at the Technical University of Madrid. Her research interests are in quantitative analysis of agricultural policies, the development of agro-economic modelling tools for policy impact assessment as well as the integrated assessment of environmental and agricultural policies. She has extensive experience in the linkage of biophysical and economic models, in particular in the fields of water economics and climate change impact assessment.

Address: Department of Agricultural Economics, Universidad Politécnica de Madrid (UPM), Avda. Complutense 3-28040, Madrid, Spain. E-mail: maria.blanco@upm.es

**Pavel Ciaian** is a senior researcher at the Institute for Prospective Technological Studies (IPTS) of the Joint Research Centre (JRC) of the European Commission. He studied at KU Leuven University in Belgium. Before joining the JRC, he was senior researcher at the LICOS Centre for Institutions and Economic Performance of KU Leuven University and Assistant Professor of Economics at the

Slovak Agricultural University. His research interests focus on agricultural policy, institutional economics, and energy and development economics.

Address: IPTS, JRC – EU Commission, Ed. EXPO-c/Inca Garcilaso 3, 41092 Seville, Spain. E-mail: pavel.ciaian@ec.europa.eu

**Jinxiu Ding** is an Assistant Professor in the School of Economics, Xiamen University, China. Her recent research focus is on the analysis of the regional impact of increased drought frequency on water management and the regional effects of decadal climate variability on crop yields.

Address: Department of Public Economics, School of Economics, Xiamen University, Xiamen, Fujian, China. E-mail: jinxiuding@gmail.com

**Michele Donati** is a researcher at the Department of Biosciences, University of Parma, Italy. He has a PhD in Agri-food Economics and teaches Economic Modelling for Environmental Assessments. His main field of research concerns the evaluation of agricultural policies through quantitative models based on mathematical programming. He participated in several European research projects on the evaluation of Common Agricultural Policy (CAP) reforms.

Address: Department of Biosciences, University of Parma, Viale Usberti, 33/A-43124, Parma, Italy. E-mail: michele.donati@unipr.it

**Vera Eory** is an environmental economist in the Land Economy, Environment and Society (LEES) Research Group of Scotland's Rural College (SRUC). Her research focuses on the economic and environmental implications of greenhouse gas reduction in agriculture, particularly on the cost-effectiveness of mitigation practices, environmental co-effects and uncertainties. She is also interested in farmers' perceptions of greenhouse gas (GHG) mitigation and climate policy design.

Address: LEES, Scotland's Rural College, Edinburgh, EH9 3JG, UK. E-mail: vera.eory@sruc.ac.uk

**Maria Espinosa** is a senior researcher at the Institute for Prospective Technological Studies (IPTS) of the Joint Research Centre (JRC) of the European Commission. She is an agricultural engineer with a PhD in agricultural economics from the Technical University of Madrid. Before joining the JRC she was a junior researcher at the Andalusian Institute of Agricultural Research and Training (IFAPA). Her main research focus is farm-level modelling, agricultural policy impact analyses and behavioural economics.

Address: IPTS, JRC – EU Commission, Ed. EXPO-c/Inca Garcilaso 3, 41092 Seville, Spain. E-mail: maria.espinosa@ec.europa.eu

**Joana Guimarães Ferreira** is a researcher within the Policy, Innovation and Behaviours Team of the Land Economy, Environment and Society (LEES) Research Group of Scotland's Rural College (SRUC). Her most recent research has focused on modelling the impacts of farmer decision making on ecosystem services provision and on identifying determinants of conservation behaviour.

Address: LEES, Scotland's Rural College, Edinburgh, EH9 3JG, UK. E-mail: joana.ferreira@sruc.ac.uk

**Patrick R. Gillespie** is a postdoctoral researcher in the Agricultural Economics and Farm Surveys Department of the Rural Economy and Development Programme (REDP) of Teagasc, the Agriculture and Food Development Authority of Ireland. His main research interests include efficiency and productivity in the Irish dairy sector, economic analysis of greenhouse gas emissions resulting from agricultural activity and analysing the international competitive performance and potential of Irish agriculture.

Address: REDP, Teagasc, Athenry, Co. Galway, Ireland. E-mail: patrick.gillespie@teagasc.ie

**Alexander Gocht** is a senior researcher at the Thünen Institute of Farm Economics. He studied agricultural economics at Imperial College London and completed his PhD at Bonn University on methods of economic farm modelling. His research interests focus on EU agricultural policy, farm modelling, and environmental protection and sustainability.

Address: Thünen Institute (Institute of Farm Economics), Bundesallee 50, 38116, Braunschweig, Germany. E-mail: alexander.gocht@thuenen.de

**Sergio Gomez y Paloma** is a senior researcher at the Institute for Prospective Technological Studies (IPTS) of the Joint Research Centre (JRC) of the European Commission. He studied Agricultural Sciences and Agricultural Economics at the Universities of Bologna, Milan and Naples (Italy), and

AgroParisTech (France). Before joining the JRC he was a Lecturer of Development Economics at Roskilde University in Denmark. His main research interests include agricultural policy analysis, agricultural microeconomics and development economics.

Address: IPTS, JRC – EU Commission, Ed. EXPO-c/Inca Garcilaso 3, 41092 Seville, Spain. E-mail: sergio.gomez-y-paloma@ec.europa.eu

**Eleonore Guillem** is a former postdoctoral research in ecological systems at LPED – UMR (Laboratoire Environnement Populations Développement – Unité Mixte de Recherche), Université Aix-Marseille. She has a PhD in Environmental Sciences from the University of Edinburgh, UK.

Address: LPED – UMR, Université Aix-Marseille, 52 rue du Capitaine Galinat, M2, 13005 Marseille, France. E-mail: eleonore.guillem@gmail.com

**Thomas Heckeley** is Professor for Economic and Agricultural Policy in the Institute for Food and Resource Economics of the Faculty of Agriculture of the University of Bonn, Germany. His main research work is on quantitative impact analysis of agricultural policies and the development of related methods, specifically the empirical specification of simulation models. More recently, the dynamics of agricultural systems and markets has attracted his attention.

Address: Institute for Food and Resource Economics, University of Bonn, Nußallee 21, 53115 Bonn, Germany. E-mail: thomas.heckeley@ilr.uni-bonn.de

**David A. Hennessy** is Professor and Elton R. Smith Chair in Food and Agricultural Policy, Department of Agricultural, Food and Resource Economics, Michigan State University. His research interests are in the production economics of animal and crop agriculture, together with their linkages to agricultural, food and environmental policies.

Department of Agricultural, Food and Resource Economics, Michigan State University, 446 W. Circle, Dr., Rm 207, Morrill Hall of Agriculture, East Lansing MI 48824, USA. E-mail: hennes64@anr.msu.edu

**Thia Hennessy** is an agricultural economist and Head of the Agricultural Economics and Farm Surveys Department of the Rural Economy and Development Programme (REDP) of Teagasc, the Agriculture and Food Development Authority of Ireland. Her main research focus is on modelling the impact of agricultural and environmental policy on the viability and sustainability of farming. She is head of the Teagasc National Farm Survey, the Irish component of the Farm Accountancy Data Network (FADN) of Europe, which produces the official data on output, input and income in farming in Ireland.

Address: REDP, Teagasc, Athenry, Co. Galway, Ireland. E-mail: thia.hennessy@teagasc.ie

**Stephen Hynes** is a natural resource economist and lecturer at the National University of Ireland, Galway (NUIG). His main research interest is in microeconomic behaviour analysis related to natural resource/environmental policy. He is currently the Scientific Director of the Whitaker Institute of NUIG and is also Head of the Socio-Economic Marine Research Unit of NUIG.

Address: Socio-Economic Marine Research Unit, Whitaker Institute, NUI Galway, Ireland. E-mail: stephen.hynes@nuigalway.ie

**Michael MacLeod** is a researcher in climate change mitigation within the Land Economy, Environment and Society (LEES) Research Group of Scotland's Rural College (SRUC). His main research interests are in using life-cycle analysis to quantify greenhouse gas (GHG) emissions arising from the production of food commodities and the identification of cost-effective ways of reducing emissions. He is also engaged in research into the broader regulatory challenges posed by agriculture–environment interactions.

Address: LEES, Scotland's Rural College, Edinburgh, EH9 3JG, UK. E-mail: michael.macleod@sruc.ac.uk

**Bruce A. McCarl** is University Distinguished Professor and Regents Professor in Agricultural Economics at Texas A&M University. His research focuses on the economic implications of global climate change, greenhouse gas emission reduction and water allocation/policy, as well as on the applications of optimization theory.

Address: Department of Agricultural Economics, Texas A&M University, College Station, TX 77843-2124, USA. E-mail: mccarl@tamu.edu
