**DEDICATION**

**This piece of work is dedicated**

**To My Family**

## ACKNOWLEDGMENT

The researcher wishes to extend her most sincere gratitude to the following people who made this piece of work a reality.

Dr. Cecilia N. Gascon, President of Southern Luzon State University, Republic of the Philippines, who made possible the linkage with Thai Nguyen University and the offering of Doctor of Business Administration, through the ITC-TUAF;

Dr. Dang Kim Vui, the President of Thai Nguyen University, who made the linkage with Southern Luzon State University, Republic of the Philippines and the offering of Doctor of Business Administration, through the ITC-TUAF;

Dr. Alice T. Valerio, for her support and supervision throughout my graduate study program. Her kindness and daily instructions in the last three years are greatly appreciated and this dissertation is as much her work as mine;

Prof. Nordelina Ilano, Director, Office for International Affairs of URS for her support to the DBA1 students;

Dr. Tran Thanh Van, the Dean of the Graduate School of Thai Nguyen University, for his assistance and encouragement to pursue this study;

Dr. Dang Xuan Binh, the Director of International Training Center, for his assistance and encouragement to pursue this study;

Dr. Nguyen Thanh Hai, the Vice Director of International Training Center, for his assistance and encouragement to pursue this study as DBA Class Manager;

To all the SLSU and TNU Professors, for their support and guidance extended throughout the graduate studies in Thai Nguyen University, Vietnam;

To his ever dearest friends for their kindness and remarkable support;

To his family, for their support, encouragement for being the sources of greatest inspiration, which made his career a success.

## ABSTRACT

In recent years, the world has witnessed the economic recovery of a number of countries affected by financial crisis in the period 2008 to 2009. International economy is in ongoing strong growth, but unemployment all over the world puts pressure on labor and jobs. Each year, Vietnam economy have more than 1 million new labors and labor status is always excessive as we mention before. Exporting labor is essential way to solve this issue and earning foreign currency for economy. Competition happen in everywhere and every sectors, including labor export. Hence, determining competitiveness of Vietnamese labor is a key point to develop.

With this point of view, the dissertation proposes a system of a set of criteria to evaluate the competitiveness of labor export. Base on these indicators, the dissertation evaluated competitiveness of labor export under two points of view: Direct assessment of international employers and indirect evaluation by comparing capacity of labor export and qualifications of international employers. In addition, the dissertation compared the perceived competitiveness of labor export across countries and markets.

Further, the dissertation uses multivariate regression equation to evaluate fully factors affecting to competitiveness of export labors in North-East Asia market. Base on these analyses, the dissertation proposes value recommendations to improve competitiveness of Vietnamese labor export. They are highly value information for government in building plans and strategies of labor export.
