This book is a collection of ideas, theories, and models—the result of a professional lifetime of discussions, teaching, thought, and work in the library and information professions. Influential in this thinking was the critical input for almost 50 years of Natalia Greer, wife of Roger. She was a librarian responsible for influencing Roger to enter that profession, and she was always there, critiquing his thinking and offering constructive and sometimes acerbic suggestions as we did our work.

Nat left us in September 2003, but our memories of her and her contributions to our thinking are indelible. To her we dedicate this book.
