We would like to acknowledge the advice of teachers from all over the world who participated in online reviews, focus groups, and editorial reviews. We relied heavily on teacher input throughout the extensive development process of the Q series, and many of the features in the series came directly from feedback we gathered from teachers in the classroom. We are grateful to all who helped.

# Q connects critical thinking, language skills, and learning outcomes.

## LANGUAGE SKILLS

Explicit skills instruction enables students to meet their academic and professional goals.

## LEARNING OUTCOMES

Clearly identified learning outcomes focus students on the goal of their instruction.

**UNIT 9**

- Listening for signposts
- using the dictionary
- types of sentences
- intonation in different types of sentences
- agreeing and disagreeing

**LEARNING OUTCOMES**

- understand a speaker's culture/language
- use cultural knowledge
- use communication skills

**QUESTION**  
Can money buy happiness?

**PREVIEW THE UNIT**

- Discuss these questions with your classmates. How much money do you think people should have to be happy? Explain.
- Do you think money makes people more successful? Why or why not?
- Living in this house, how would you spend your money? How do you think it would be used?

**CRITICAL THINKING**

Thought-provoking unit questions engage students with the topic and provide a critical thinking framework for the unit.

Having the learning outcome is important because it gives students and teachers a clear idea of what the point of each task/activity in the unit is.
