REX MILLER & MARK R. MILLER

# **Air Conditioning and Refrigeration**

## **ABOUT THE AUTHORS**

**Rex Miller** is professor emeritus of industrial technology at the State University of New York–College at Buffalo, where he taught technical curriculums for more than 40 years. He has authored or co-authored more than 100 texts for vocational and industrial arts programs, including McGraw-Hill's *Carpentry & Construction*, now in its fifth edition.

**Mark R. Miller** is a professor of technology and coordinator for the industrial management programs in the Department of Human Resource Development & Technology at The University of Texas at Tyler. He has authored or co-authored more than 35 technical books, including McGraw-Hill's *Carpentry & Construction*, now in its fifth edition.

## **1 Tools, Instruments, and Specialized Equipment**

---

### **Performance Objectives 2**

#### **Tools and Equipment 2**

- Pliers and Clippers 2
- Fuse Puller 2
- Screwdrivers 2
- Wrenches 3
- Soldering Equipment 3
- Drilling Equipment 4
- Knives and Other Insulation-Stripping Tools 4
- Meters and Test Prods 6
- Tool Kits 7

#### **Gauges and Instruments 9**

- Pressure Gauges 10
- Gauge Selection 10
- Line Pressure 11
- Effects of Temperature on Gauge Performance 12
- Care of Gauges 12
- Gauge Recalibration 13

#### **Thermometers 14**

- Pocket Thermometer 14
- Bimetallic Thermometers 16
- Thermocouple Thermometers 17
- Resistance Thermometers 17
- Digital Thermometers 17

#### **What Is Superheat? 18**

- How Does It Work? 18
- Operation 19
- Subcooling 19
- Target Superheat and Subcooling 19

#### **Superheat Measurement Instruments 20**

#### **Halide Leak Detectors 23**

- Setting Up 24
- Lighting 24

Leak Testing the Setup 25

Adjusting the Flame 25

Detecting Leaks 25

Digital Leak Detectors 25

#### **Electrical Instruments 28**

- Ammeter 28
- Voltmeter 28
- Ohmmeters 30
- Multimeter 31
- Digital Multimeter 31
- Wattmeter 33

#### **Other Instruments 33**

- Air Filter Efficiency Gauges 34
- Air Measurement Instruments 34
- Newer Measurement Instruments 34
- Humidity Measurement Instruments 34
- Relative Humidity Measurements by Digital Meter 35
- Vibration and Sound Meters 35

#### **Service Tools 36**

#### **Special Tools 37**

#### **Vacuum Pumps 37**

- Vacuum Pump Maintenance 39
- Vacuum Pump Oil Problems 39
- Operating Instructions 39
- Evacuating a System 39

#### **Charging Cylinder 40**

#### **Charging Oil 41**

#### **Changing Oil 41**

#### **Mobile Charging Stations 41**

- Standalone Vacuum Gauge 41

#### **Tubing 42**

- Soft Copper Tubing 42
- Hard-Drawn Copper Tubing 43
- Cutting Copper Tubing 43
- Flaring Copper Tubing 45
- Constricting Tubing 45
- Swaging Copper Tubing 47
- Forming Refrigerant Tubing 47
- Fitting Copper Tubing by Compression 48

Soldering	48
Soft Soldering	49
Silver Soldering or Brazing	49
Testing for Leaks	51
Cleaning and Degreasing Solvents	51
Review Questions	52

## 2 Development of Refrigeration

---

Performance Objectives	54
Historical Development	54
Structure of Matter	54
Elements	55
Atom	55
Properties of Matter	55
Pressure	56
Pressure Indicating Devices	56
Pressure of Liquids and Gases	57
Atmospheric Pressure	57
Gauge Pressure	57
Absolute Pressure	57
Compression Ratio	58
Temperature and Heat	58
Specific Heat	59
Heat Content	59
Sensible Heat	59
Latent Heat	59
Other Sources of Heat	60
Refrigeration Systems	60
Refrigeration from Vaporization (Open System)	60
Basic Refrigeration Cycle	60
Capacity	62
Refrigerants	62
Refrigerant Replacements and the Atmosphere	62
Review Questions	63

## 3 Voltage, Current, and Resistance

---

Performance Objectives	66
Ohm's Law	66
Series Circuits	66
Parallel Circuits	68
Current in a Parallel Circuit	68
Resistance in a Parallel Circuit	69
AC and DC Power	69
Phase	70
Power in DC Circuits	70
Power Rating of Equipment	71
Capacitors	71
How a Capacitor Works	72

Capacity of a Capacitor	73
Dielectric Failure	73
Basic Units of Capacitance	73
Working With Capacitive Values	73
Capacitor Types	74
Capacitor Tolerances	77
<b>The AC Circuit and the Capacitor</b>	<b>77</b>
Uses of Capacitors	79
<b>Inductance</b>	<b>79</b>
Four Methods of Changing Inductance	79
Self-Inductance	79
Mutual Inductance	80
Inductive Reactance	81
Uses of Inductive Reactances	81
<b>Transformers</b>	<b>81</b>
Transformer Construction	81
Turns Ratio	82
Transformer Applications	82
<b>Semiconductors</b>	<b>82</b>
Diodes	82
Transistors	83
Silicon-Controlled Rectifier	84
<b>Bridge Circuits</b>	<b>84</b>
Wheatstone Bridges	84
Variable Resistor	85
<b>Sensors</b>	<b>85</b>
Temperature Elements	86
Humidity Elements	86
<b>Controllers</b>	<b>87</b>
Single-Element Controllers	88
Dual-Element Controllers	90
<b>Actuators</b>	<b>90</b>
Electro-Hydraulic Actuators	90
Thermal Actuators	91
<b>Auxiliary Devices</b>	<b>92</b>
<b>Electronic Compressor Motor Protection</b>	<b>92</b>
Operation	92
Troubleshooting the Control	93
Restoring Service	95
Review Questions	95

## 4 Solenoids and Valves

---

Performance Objectives	98
<b>Industrial Solenoids</b>	<b>98</b>
Tubular Solenoids	98
Frame Solenoids	98
<b>Applications</b>	<b>101</b>
Solenoids as Electromagnets	101
Solenoid Coils	101
Servicing Coils	101
<b>Solenoid Valves in Circuits</b>	<b>102</b>
Refrigeration Valve	103
Review Questions	104

## **5 Electric Motors: Selection, Characteristics, and Problems**

---

<b>Performance Objectives</b>	<b>106</b>
<b>Construction of an Induction Motor</b>	<b>106</b>
Single-Phase Motors	107
Shaded-Pole Motor	107
Split-Phase Motor	107
Capacitor-Start Motor	108
<b>Motors Sizes</b>	<b>108</b>
<b>Cooling and Mounting Motors</b>	<b>109</b>
<b>Direction of Rotation</b>	<b>110</b>
<b>Synchronous Motor</b>	<b>111</b>
Theory of Operation	111
Synchronous Motor Advantages	112
Properties of the Synchronous Motor	112
<b>Electric Motors</b>	<b>113</b>
Starting the Motor	113
<b>Repulsion-Induction Motor</b>	<b>114</b>
<b>Capacitor-Start Motor</b>	<b>115</b>
<b>Permanent Split-Capacitor Motor</b>	<b>116</b>
<b>Shaded-Pole Motor</b>	<b>116</b>
<b>Split-Phase Motor</b>	<b>118</b>
<b>Polyphase-Motor Starters</b>	<b>119</b>
<b>Reduced-Voltage Starting Methods</b>	<b>120</b>
Primary-Resistor Starting	120
Autotransformer Starting	123
Part-Winding Starting	124
Wye-Delta or Star-Delta Starters	125
Multispeed Starters	127
<b>Consequent-Pole Motor Controller</b>	<b>128</b>
<b>Full-Voltage Controllers</b>	<b>131</b>
Starting Sequence	133
Protection Against Low Voltage	133
Time-Delay Protection	133
<b>Electric Motors: Their Uses, Operation, and Characteristics</b>	<b>136</b>
Motor Rotation	137
Variable-Speed Drives	137
<b>Troubleshooting Electric Motors With a Volt-Ammeter</b>	<b>137</b>
<b>Split-Core AC Volt-Ammeter</b>	<b>138</b>
Testing for Grounds	139
Testing for Opens	139
Checking for Shorts	140
Testing Squirrel-Cage Rotors	140
Testing the Centrifugal Switch in a Split-Phase Motor	140
Test for Short Circuit Between Run and Start Windings	140
Test for Capacitors	140
<b>Using the Megohmmeter for Troubleshooting</b>	<b>142</b>
<b>Insulation-Resistance Testing</b>	<b>142</b>
Measuring Insulation Resistance	143
Power Tools and Small Appliances	143

<b>Hermetic Compressor Systems</b>	<b>144</b>
Circuit Breakers and Switches	144
Coils and Relays	144
<b>AC Motor Control</b>	<b>144</b>
Motor Controller	145
<b>AC Squirrel-Cage Motor</b>	<b>145</b>
Enclosures	146
Code	146
Protection of the Motor	146
<b>Contactors, Starters, and Relays</b>	<b>146</b>
Motor-Overload Protector	146
Motor-Winding Relays	147
<b>Solenoid Valves</b>	<b>147</b>
<b>Refrigeration Valve</b>	<b>148</b>
Application	148
Operation	148
Installation	149
Temperature Controls	149
<b>Bimetallic Thermostats</b>	<b>150</b>
Thermostat Construction and Wiring	151
<b>Defrost Controls</b>	<b>151</b>
Defrost Timer Operation	151
Hot-Gas Defrosting	152
<b>Motor Burnout Cleanup</b>	<b>152</b>
Procedure for Small Tonnage Systems	152
Procedure for Large Tonnage Systems	154
<b>Reading a Schematic</b>	<b>154</b>
<b>Review Questions</b>	<b>156</b>

## **6 Refrigerants: New and Old**

---

<b>Performance Objectives</b>	<b>160</b>
<b>Refrigerants</b>	<b>160</b>
<b>Classification of Refrigerants</b>	<b>160</b>
Common Refrigerants	160
<b>Freon Refrigerants</b>	<b>162</b>
Molecular Weights	162
Flammability	162
Toxicity	162
Skin Effects	162
Oral Toxicity	162
Central Nervous System (CNS) Effects	163
Cardiac Sensitization	165
Thermal Decomposition	166
<b>Applications of Freon Refrigerants</b>	<b>166</b>
<b>Reaction of Freon to Various Materials Found in Refrigeration Systems</b>	<b>169</b>
Metals	169
Plastics	169
Substitutes for Freon Used in Industrial Processes	170
<b>Refrigerant Properties</b>	<b>170</b>
Pressure	170
Temperature	170
Volume	171
Density	171

Enthalpy	171	Reclaiming Refrigerant	185
Flammability	171	Description	185
Capability of Mixing With Oil	171	Compressor	186
Moisture and Refrigerants	172	Oil Separator	186
Odor	172	Condenser	187
Toxicity	173	Filter Drier	187
Tendency to Leak	173	Accumulator/Oil Trap	187
<b>Detecting Leaks</b>	<b>173</b>	<b>Operation of the Unit</b>	<b>187</b>
Sulfur Dioxide	173	Recovery Plus/Recovery Operations	188
Carbon Dioxide	173	Storage Cylinder Cooling	189
Ammonia	174	Recycle Operation	189
Methyl Chloride	174	Recharge Operation	191
<b>Ban on Production and Imports of</b>		Service Operation	191
<b>Ozone-Depleting Refrigerants</b>	<b>174</b>	Test Operation	191
Phase-Out Schedule for HCFCs,		Control Circuits	191
Including R-22	175	<b>Troubleshooting</b>	<b>193</b>
Availability of R-22	175	Troubleshooting Approach	193
Cost of R-22	175	<b>Questions and Answers on Alternative</b>	
<b>Alternatives to R-22</b>	<b>175</b>	<b>Refrigerants (EPA)</b>	<b>193</b>
Servicing Existing Units	175	General Questions	194
Installing New Units	176	<b>Questions from Manufacturers</b>	<b>195</b>
Servicing Your System	176	Review Questions	196
Purchasing New Systems	176		
<b>Air Conditioning and Working With</b>			
<b>Halon</b>	<b>176</b>		
General Information	176		
<b>Leak Repair</b>	<b>177</b>		
Trigger Rates	177		
When Additional Time Is Necessary	177		
Relief from Retrofit/Retirement	178		
System Mothballing	178		
<b>Epa-Certified Refrigerant Reclaimers</b>	<b>178</b>		
<b>Newer Refrigerants</b>	<b>178</b>		
<b>Freon Refrigerants</b>	<b>178</b>		
Classifications	178		
Properties of Freons	179		
Physical Properties	179		
<b>Refrigerant Characteristics</b>	<b>180</b>		
Critical Temperature	180		
Latent Heat of Evaporation	181		
Specific Heat	181		
Power Consumption	181		
Volume of Liquid Circulated	182		
<b>Handling Refrigerants</b>	<b>182</b>		
Storing and Handling Refrigerant Cylinders	182		
<b>Lubricants</b>	<b>183</b>		
<b>R-134a Refrigerant</b>	<b>184</b>		
R-134a Applications	184		
<b>R-12 Systems—General</b>			
<b>Considerations</b>	<b>184</b>		
R-12 Medium/High Temperature			
Refrigeration (>60°F evap)	184		
R-12 Low Temperature Refrigeration			
(<20°F evap)	184		
R-401B	184		
R-402A	185		
R-402B	185		

## 7 Refrigeration Compressors

<b>Performance Objectives</b>	<b>198</b>
<b>Compressors</b>	<b>198</b>
<b>Condensers</b>	<b>200</b>
Air-Cooled Condensers	200
Water-Cooled Condensers	200
Hermetic Compressors	200
Compressor Types	200
Newer Models Designations and	
Coding	208
<b>Hermetic Compressor Motor Types</b>	<b>211</b>
Resistance Start-Induction Run	212
Capacitor Start-Induction Run	212
Capacitor Start and Run	212
Permanent Split Capacitor	213
<b>Compressor Motor Relays</b>	<b>213</b>
Current-Type Relay	213
Potential-Type Relay	213
<b>Compressor Terminals</b>	<b>213</b>
Built-Up Terminals	214
Glass Quick-Connect Terminals	215
<b>Motor Mounts</b>	<b>215</b>
<b>Crankcase Heaters</b>	<b>215</b>
<b>Electrical Systems for Compressor</b>	
<b>Motors</b>	<b>218</b>
Normal Starting Torque Motors (RSIR)	
With a Current-Type Relay	218
High-Starting Torque Motors (CSIR)	
With a Current-Type Relay	221
High-Starting Torque Motors (CSIR) With	
a Two-Terminal External Overload and a	
Remote-Mounted Potential Relay	225
