Contents at a Glance

Introduction	1
Part I Core JavaScript	7
1 Object()	9
2 Function()	37
3 Array()	57
4 String()	77
5 Boolean()	103
6 Date()	111
7 Number()	137
8 Math	157
9 RegExp()	171
10 Error()	201
11 The Global Object and Statements	213
12 Operators	237
13 JavaScript Syntax	255
14 Conditional Compilation in Internet Explorer	265
Part II Window and Client Objects	273
15 window	275
16 location	363
17 history	375
18 navigator	381
19 screen	407
Part III Document Object Model for HTML Documents	415
20 Core DOM Objects	417
21 HTMLElement	477
22 HTMLHtmlElement	509
23 HTMLDocument/document	515
24 Head Elements	561

25	Form Elements	579
26	Form Input Elements: HTMLInputElement	649
27	List Elements	667
28	Text Formatting Elements	691
29	Table Elements	777
30	Image Elements	835
31	Programmable Elements	863
32	DOM-2 Events and Event Handlers	907
33	Styling for HTML Elements	985
34	DOM-2 Range	1017
35	Cookies	1057
Part IV	The Future	1069
36	XML-Related Technologies and Their DOMs	1071
	Index	1099

Table of Contents

	Introduction	1
Part I	Core JavaScript	7
1	Object()	9
	Description.....	10
	Creating a New Object.....	10
	Getters and Setters of Netscape 6.....	11
	Adding Properties and Methods to an Object.....	13
	Objects Are Typically Unique.....	13
	Returning New Objects Outside of a Function.....	13
	Preparing Your Objects for Others.....	15
	Most Objects You Create Have a Parent Object.....	17
	Properties.....	18
	Methods.....	21
	Example: Creating a Persistent Reference to this.....	32
2	Function()	37
	Description.....	38
	Executing a Function.....	38
	Declaring Objects Inside Functions.....	39
	Browser Differences in Properties Returned.....	39
	Functions Defined Within Functions.....	40
	Functions Can Call Themselves: Recursion.....	40
	Exiting from a Function Gracefully.....	43
	The return Statement Exits a Function.....	45
	Properties.....	46
	Methods.....	50
	Example: Using the Function() Objects' Source Codes.....	53
3	Array()	57
	Description.....	58
	Numbered and Unnumbered Properties of Arrays.....	59
	An Array's Elements Can Be Any Object or Value.....	60
	Populating an Array Automatically.....	61

Properties	61
Methods	63
Example: An Extensible switch Function	73
4 String()	77
Description	78
HTML and Strings: The Connection	79
JavaScript and Strings: The Other Connection	79
String HTML-Related Methods Are Not XHTML-Compliant	80
Errata in JScript Documentation Regarding Strings	81
Properties	82
Methods	82
Example: Strings in HTML	99
5 Boolean()	103
Description	104
Defining Boolean() Objects by Comparison	104
Defining Boolean() Object Values by the Boolean() Function	105
Properties	106
Methods	107
Example: Shorthand for an if Statement	108
6 Date()	111
Description	112
A Special Number Line for Time	112
JavaScript's Interpretation of This Timeline	113
Determining a Specific Date	113
Instances of Date() Obey the Rules of Number Arithmetic	114
Properties	115
Methods	115
Example: Detecting Daylight Savings Time	134
7 Number()	137
Description	138
Numbers Are Everywhere in JavaScript	138
JavaScript Supports Scientific Notation	141
Accessing Properties and Methods of Number Literals	141
The Number() Function Performs a Type Change	142

Properties	143
Methods	146
Example: Implementing Complex Numbers in JavaScript	149
8 Math	157
Description	157
Properties	158
Methods	161
Example: A Logarithm Function for Multiple Bases	168
9 RegExp()	171
Description	173
The Special Characters of Regular Expressions	173
The Literal Notation of RegExp() Objects	178
The Flags of Regular Expressions	183
Properties	185
Methods	194
Example: Regular Expressions and Text Exercises	197
10 Error()	201
Description	202
Properties	203
Methods	208
Example: Creating and Using Errors	209
11 The Global Object and Statements	213
Top-Level Objects	214
Top-Level Functions	215
Statements	221
Controlling How a Script Runs	233
12 Operators	237
The Primary Assignment Operator	238
Arithmetic Operators	238
Comparison Operators	242
Boolean Operators	245
Bitwise Operators	247
Word Operators	250

13	JavaScript Syntax	255
	Parentheses, Square Brackets, and Curly Braces	256
	Parentheses ()	256
	Square Brackets []	257
	Curly Braces { }	257
	Quote Marks	258
	Semicolons, Colons, Commas, and Periods	259
	Semicolons ;	259
	Commas ,	260
	Colons :	260
	Periods	260
	Literals	261
	ASCII and Unicode	262
	Comment Lines //, /* ... */	262
14	Conditional Compilation in Internet Explorer	265
	Description	266
	Statements	267
	Objects	269
	Compatibility with Netscape Browsers	270
Part II	Window and Client Objects	273
15	window	275
	Description	276
	Common window Object Names	276
	Order of Operations in Loading Scripts	279
	Sending Objects and Values Between Windows	283
	The window Object, Event Handlers, and the W3C DOM	285
	Windows Have Two Names	285
	Properties	286
	Methods	306
	Event Handlers	338
	HTMLFrameSetElement /<frameset>...</frameset>	339
	Description	340
	Properties	341
	Methods	344
	Event Handlers	344

HTMLFrameElement/<frame />	345
Description	346
Methods	353
Event Handlers	354
HTMLIFrameElement/<iframe />	354
Description	355
Properties	355
Methods	357
Event Handlers	357
Example: A Basket of Windows	358
16 location	363
Description	364
Properties	364
Methods	369
Example: Sending Information from One Page to Another	370
17 history	375
Description	376
Properties	376
Methods	377
Example: Moving a Separate Frame Back	378
18 navigator	381
Description	382
Browser Sniffing, the Incorrect Way	382
Properties	384
Methods	396
Example: Browser Sniffing, the Correct Way	397
19 screen	407
Description	408
Properties	408
Example: Redirecting Based on Screen Resolution	413
