About the Author

Michael Alexander is a Microsoft Certified Application Developer (MCAD) with more than 14 years experience consulting and developing office solutions. He currently lives in Plano, TX where he serves as a Senior Program Manager for a top technology firm. In his spare time he runs a free tutorial site, www.datapigtechnologies.com, where he shares basic Access and Excel tips to the Office community.

Contents

About the Author	ix
Acknowledgments	xix
Introduction	xxi
Part I Fundamentals of Data Analysis in Access	1
Chapter 1 The Case for Data Analysis in Access	3
Where Data Analysis with Excel Can Go Wrong	3
Scalability	4
Transparency of Analytical Processes	6
Separation of Data and Presentation	7
Deciding Whether to Use Access or Excel	8
Size of Data	9
Data Structure	9
Data Evolution	9
Functional Complexity	10
Shared Processing	10
An Excel User’s Guide to Access: Don’t Panic!	10
Tables	11
Queries	11
Reports	12
Macros and VBA	12
Summary	13
Chapter 2 Access Basics	15
Access Tables	15
Table Basics	16
Opening a Table in the Datasheet View	16
Identifying Important Table Elements	17

Opening a Table in the Design View	17
Exploring Data Types	19
Before Creating a Table	20
Creating a Table with Design View	21
Field Properties	24
Primary Key	26
Getting Data into Access	28
Importing	28
Linking	28
Things to Remember About Importing Data	28
Importing Data from an Excel Spreadsheet	29
Importing Data from a Text File	30
Understanding the Relational Database Concept	30
Why Is This Concept Important?	30
Excel and the Flat-File Format	31
Splitting Data into Separate Tables	33
Foreign Keys	34
Relationship Types	34
Referential Integrity	36
Cascading Updates and Deletes	37
Query Basics	37
What Is a Query?	37
Creating Your First Select Query	37
Sorting Query Results	40
Filtering Query Results	42
Querying Multiple Tables	43
Refining the Query	45
Using Operators in Queries	46
Exporting Query Results	49
Summary	49
Chapter 3 Beyond Select Queries	51
Aggregate Queries	51
Creating an Aggregate Query	52
About Aggregate Functions	56
Group By	56
Sum, Avg, Count, StDev, Var	57
Min, Max, First, Last	58
Expression, Where	58
Action Queries	61
Why Use Action Queries?	62
Make-Table Queries	62
Why Use a Make-Table Query?	62
What Are the Hazards of Make-Table Queries?	62
Creating a Make-Table Query	63
Delete Queries	65
Why Use a Delete Query?	65
What Are the Hazards of Delete Queries?	65
Creating a Delete Query	66

Append Queries	68
Why Use an Append Query?	68
What Are the Hazards of Append Queries?	69
Creating an Append Query	71
Update Queries	74
Why Use an Update Query?	75
What Are the Hazards of Update Queries?	75
Creating an Update Query	75
A Word on Updatable Datasets	78
Crosstab Queries	78
Using the Crosstab Query Wizard	79
Creating a Crosstab Query Manually	84
Using the Query Design Grid to Create Your Crosstab Query	85
Customizing Your Crosstab Queries	88
Summary	90
Part II Basic Analysis Techniques	93
Chapter 4 Transforming Your Data with Access	95
Finding and Removing Duplicate Records	96
Defining Duplicate Records	96
Finding Duplicate Records	97
Removing Duplicate Records	100
Common Transformation Tasks	102
Filling in Blank Fields	102
Concatenating	104
Concatenating Fields	104
Augmenting Field Values with Your Own Text	105
Changing Case	107
Removing Leading and Trailing Spaces from a String	109
Finding and Replacing Specific Text	110
Adding Your Own Text in Key Positions Within a String	112
Parsing Strings Using Character Markers	116
Query 1	118
Query 2	119
Summary	120
Chapter 5 Working with Calculations and Dates	121
Using Calculations in Your Analysis	121
Common Calculation Scenarios	122
Using Constants in Calculations	122
Using Fields in Calculations	123
Using the Results of Aggregation in Calculations	124
Using the Results of One Calculation as an Expression in Another	124
Using a Calculation as an Argument in a Function	125
Using the Expression Builder to Construct Calculations	126

Common Calculation Errors	130
Understanding the Order of Operator Precedence	130
Watching Out for Null Values	131
Watching the Syntax in Your Expressions	133
Using Dates in Your Analysis	134
Simple Date Calculations	134
Advanced Analysis Using Functions	135
The Date Function	135
The Year, Month, Day, and Weekday Functions	139
The DateAdd function	141
Grouping Dates into Quarters	143
The DateSerial Function	145
Summary	146
Chapter 6 Performing Conditional Analysis	149
Using Parameter Queries	149
How Parameter Queries Work	151
Ground Rules of Parameter Queries	151
Working with Parameter Queries	152
Working with Multiple Parameter Conditions	152
Combining Parameters with Operators	153
Combining Parameters with Wildcards	154
Using Parameters as Calculation Variables	155
Using Parameters as Function Arguments	156
Using Conditional Functions	159
The If Function	159
Using If to Avoid Mathematical Errors	159
Using If to Save Time	161
Nesting If Functions for Multiple Conditions	163
Using If Functions to Create Crosstab Analyses	164
The Switch Function	166
Comparing the If and Switch Functions	167
Summary	169
Part III Advanced Analysis Techniques	171
Chapter 7 Understanding and Using SQL	173
Understanding Basic SQL	173
The SELECT Statement	175
Selecting Specific Columns	175
Selecting All Columns	176
The WHERE Clause	176
Making Sense of Joins	177
Inner Joins	177
Outer Joins	178
Getting Fancy with Advanced SQL Statements	179
Expanding Your Search with the Like Operator	180
Selecting Unique Values and Rows without Grouping	181

Grouping and Aggregating with the GROUP BY Clause	182
The HAVING Clause	183
Setting Sort Order with the ORDER BY Clause	183
Creating Aliases with the AS Clause	183
Creating a Column Alias	184
Creating a Table Alias	184
SELECT TOP and SELECT TOP PERCENT	184
Top Values Queries Explained	184
SELECT TOP	186
SELECT TOP PERCENT	187
Performing Action Queries via SQL Statements	187
Make-Table Queries Translated	187
Append Queries Translated	188
Update Queries Translated	188
Delete Queries Translated	188
Creating Crosstabs with the TRANSFORM Statement	188
Using SQL Specific Queries	189
Merging Datasets with the UNION Operator	189
Creating a Table with the CREATE TABLE Statement	191
Manipulating Columns with the ALTER TABLE Statement	192
Adding a Column with the ADD Clause	192
Altering a Column with the ALTER COLUMN Clause	193
Deleting a Column with the DROP COLUMN Clause	193
Summary	193
Chapter 8	
Subqueries and Domain Aggregate Functions	195
Enhancing Your Analysis with Subqueries	196
Why Use Subqueries?	197
Subquery Ground Rules	197
Creating Subqueries without Typing SQL Statements	198
Using IN and NOT IN with Subqueries	201
Using Subqueries with Comparison Operators	201
Using Subqueries as Expressions	202
Using Correlated Subqueries	203
Uncorrelated Subqueries	203
Correlated Subqueries	203
Using a Correlated Subquery as an Expression	205
Using Subqueries within Action Queries	205
A Subquery in a Make-Table Query	205
A Subquery in an Append Query	205
A Subquery in an Update Query	206
A Subquery in a Delete Query	206
Domain Aggregate Functions	208
Understanding the Different Domain Aggregate Functions	210
DSum	210
DAvg	210
DCount	211
DLookup	211

DMin and DMax	211
DFirst and DLast	211
DStDev, DStDevP, DVar, and DvarP	211
Examining the Syntax of Domain Aggregate Functions	212
Using No Criteria	212
Using Text Criteria	212
Using Number Criteria	213
Using Date Criteria	213
Using Domain Aggregate Functions	214
Calculating the Percent of Total	214
Creating a Running Count	215
Using a Value from the Previous Record	217
Summary	219
Chapter 9 Running Descriptive Statistics in Access	221
Basic Descriptive Statistics	222
Running Descriptive Statistics with Aggregate Queries	222
Determining Rank, Mode, and Median	223
Ranking the Records in Your Dataset	224
Getting the Mode of a Dataset	225
Getting the Median of a Dataset	227
Pulling a Random Sampling from Your Dataset	229
Advanced Descriptive Statistics	231
Calculating Percentile Ranking	231
Determining the Quartile Standing of a Record	233
Creating a Frequency Distribution	235
Summary	240
Chapter 10 Analyzing Data with Pivot Tables and Pivot Charts	241
Pivot Tables in Access?	242
The Anatomy of a Pivot Table	243
The Totals and Detail Area	243
The Row Area	244
The Column Area	245
The Filter Area	245
Creating a Basic Pivot Table	246
Creating an Advanced Pivot Table with Details	250
Saving Your Pivot Table	252
Sending Your Access Pivot Table to Excel	253
Pivot Table Options	254
Expanding and Collapsing Fields	255
Changing Field Captions	255
Sorting Data	256
Grouping Data	256
Using Date Groupings	259
Filtering for Top and Bottom Records	260
Adding a Calculated Total	261
